Comments: (If possible, please reference section number and/or page number in document if applicable.)

1 As a resident of Las Vegas, Nevada I find it difficult to imagine that a country with a wealth of resources is unable to find a suitable storage facility close to the origin of waste, other than Yucca Mt. The recent earthquake felt in the Vegas Valley should be enough information to know Yucca Mt. is not a suitable site.

2 Transportation of this waste across multiple states through routes like I-70 is ludicrous. What are people thinking? There must be money to be made.

3 The EIS needs to be responsible!

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible; then secure with tape.
