--> Comment Text :

1. I feel cheated that you changed the Las Vegas venue for these hearings at the last minute, less than a week, to North Las Vegas. It was an obvious manipulation to take the hearings into the area of Clark County where there are more people who have looked to Yucca Mountain and the nuclear test site as a source of employment. And, as the women who is speaking on the television broadcast this moment is saying, this is not convenient venue or time for the average citizen.

2. To the people of Esmerelda County: !!! You are willing to have this in our state as long as you get the dollars, shame on you.

3. I want you to send the complete reports to me and all residents of Clark County. Give us adequet time to study the reports and then have another hearing.

4. Transportation is a major issue. Even if the Yucca Mountain site could be proven to be the best, most secure site for storage, we have not been told an exact plan for transportion.
~~~~~~

5. Most importantly, my question is, what are the contingengy plans if you are wrong? Storing this nucleur waste is only a desperate measure to take care of the problem created by the enthusiastic use of science in the 1950's & 1960's without any consideration of its by-productics. What if you are wrong? Again. What do we do?
