--> Comment Text :
Yucca Mountain is not suitable:

It contains numerous geologic faults and is in a highly earthquake prone area. There are rapid water migration pathways in the mountain, so water will infiltrate to the wast containers, corrode them and carry radioactivity into the currently uncontaminated groundwater. A nuclear waste dump in Yucca Mountain violates the Treaty of Ruby Valley with the Western Shoshone Nation. The location of Yucca Mountain makes transportation of nuclear waste a disatrous propostions. These trucks will be subject to accident and terroists.

Thank you,

Montana Black
