Comments: (If possible, please reference section number and/or page number in document if applicable.)

1 I'm very concerned about this project. I know you've invested hours of work in this & it shows. The burial of nuclear waste ANYWHERE is not in the best interests of our planet. There are too many unanswered questions including the long-range effect/interaction of radioactive waste with the containers in which they stored, as well as the environment (air temp, earthquake potential, et al.). There are also serious transportation issues relative to locus of population centers & yes sabotage. On page S-52 in the DEIS (7/99) it is stated that "Sabotage would "unlikely" ..... Well this is only an assumption. The repository could be a target as well as the material on its way to the site. In general, burial is just NOT A GOOD IDEA FOR NEVADA (or anywhere else). DO NOT BURY WASTE HERE. SPEND THE 10 BILLION to develop neutralization !!! & reuse.
Thank you. (Wendy you are an excellent speaker, know your material. This project is not the right thing for US

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.
