1 I am a citizen of the State of Nevada and have serious concerns about the Yucca Mountain area being used as a Waste Depository site. I also have grave concerns about the "process" of keeping the public informed about the dangers to them if the current plan is implemented.

I am asking for:

1) more hearings on the SDEIS. Hold hearings at all of the locations where the draft EIS hearings took place,
2) an increase in the comment period of the SDEIS to 90 days,
3) that site recommendation hearings be held after the release of the final EIS,
4) that the comment period for the site recommendation be a minimum of six months.
