2-1-00

Dear Wendy,

1 I feel very strongly againsts the nuclear waste they are planing to put in Yucca Mountains. It is dangers not only the placing but in the transportation. If their was a crash while being tranported then that area would be contaminated also and people's lives are at risk. The risk with storing it if their is a leak it can get into the water. Their are many danger seen and unseen with this.

Singerly,
Misty West
