EIS001419

Dear Ms. Dixon,

1 I would like to go on record as being opposed to the proposed shipment of spent nuclear material through St. Louis. I feel it is totally unsafe and would put my family and future generations in danger. This is a highly populated area and it would be irresponsible to send such dangerous material through here on a regular basis for thirty years!

It is very possible that an accident could occur — or what if it were sabotaged? Please consider these concerns.

I am a 58 year old woman, mother of eight, grandmother of seven and fear for my family's safety if

this should happen.

I don't know a single person who feels safe with this plan.

Please do what you can to stop it - Sincerely,

Mrs. Jacqueline Gerth
