Ms. Wendy Dixon,

1... I am writing to request that radioactive waste not be transported across country. The risk is significant — accidents being the primary risk and the amount of radioactivity in question is the equivalent of 2.3 million atom bombs

2 I live in St. Louis and certainly don't want radioactive waste coming anywhere near my family, especially since Yucca Mountain may not solve the problem of disposal as it is in an active earthquake zone.

1 cont. Please don't ship radioactive waste!

Thanks Anne Rieser
