Wendy R. Dixon

1 I am truly disgusted about this issue of transporting Nuclear Waste through our cities. What is wrong with you people to even think of such a disturbing thing to do. We have schools, homes busy neighborhoods, traffic and etc. right next to the rail system.

Every 2 days for the next 30 years. Well believe me it won't take 30 years to destroy our cities, our people and our children, their future will be gone.

So please reconsider this method. We as citizens of the U.S.A. should have a say so regarding our lives. Our government seems to always have the money and the answers to help all the other countries and their people. Now our Government should do something for the U.S. people.

Stop NOW DON'T EVEN THING to do this HORRIBLE ACT AGAINST US The Citizens of the United States of AMERICA. TAKE CARE of US FOR A CHANGE.
