Dear Ms. Dixon, EIS Manager

My name is Vanessa Reed, we have been studying Nuclear waste in science class at Rosemary Clarke M.S.

1 I am concerned about how the truck drivers are going to transport the nuclear waste to Yucca mountain. If there was to be a spill, we are not prepared to deal with the problems.

2 I think they need to move nuclear waste to a place closer than all the way down across the country. That way, there is a better chance that it will not spill.

Concerned,
Vanessa Reed

Vanessa Reed
