Dear Ms. Dixon, EIS Manager:

I am a student of Rosemary Clarke Middle School, 8th grade. We have been studying nuclear energy with our very nice and intelligent teacher, Ms. Tronnier. She recently told us that nuclear waste will soon be transported through Las Vegas to Yucca Mountain. Then, I started to get concerned.

Here is a list of things I
1 am concerned about. If there is a spill we could be facing a lot of danger. Our economy and tourism would go down in the dumps. Our water and food could be contaminated too!
2 I think instead of

EIS002036

...2 transporting waste on I-15, they should build a special road straight to Yucca Mountain, that does not border a city of over 1,000,000 people!

Sincerly,
Chalio Gonzalez

Chalio Gonzalez
