Dear Mr Lash

1 I am opposed to spent nuclear waste being transported through Ohio, especially since the possible route of transport may be through Williams County, Ohio via the turnpike. My husband, two children and I live in Williams County, south of the Ohio turnpike.

I am very uncomfortable with the idea of nuclear waste being transported through the area I live for the next 30-50 years. That is an extremely long period of time and an enormous amount of waste to haul.

2 Unfortunately, due to the high incidence of cancer in the area (my mother is dying from multiple myeloma), I do not trust that an accident during transport will never happen. We are being exposed to something that is giving us cancer. I dare say we need more toxic substances in our area that could cause unnecessary exposure to Williams County citizens, especially my children.

Sincerely,
Joann Kempf
