Yucca Mtn. Supplement to the Draft E.I.S.

Dr. Summerson,

RECEIVED
JUL 02 2001

1 In chpt. 3-16 Transportation, one of my biggest concerns with this whole project, still does not answer my concerns.
I probably wouldn't have such a huge problem with the site of Yucca Mtn. for storage of waste material if I knew it was only going to be used by west coast generating plants. When I think of all the many more waste producing areas on the eastern U.S. transporting the hazardous materials accross our central plains states that produce most of our grains and food crops being polluted from radioactive materials in an accident from this transporting, it scares the hell out of me. Please use some good sense and strive to locate an alternative site for the eastern united states and alleviate this huge disaster waiting to happen.

Very Sincerely,
Susan L. Maple
