Subject: Yucca hearings

Part of Records Package / Supplement / Correction

Please include my comments in the Yucca Mt. hearings.

July 3, 2001

1 I OBJECT TO CONTINUING THE Yucca Mt. Nuclear Waste Dump project. With human, geologic, seismic, and hydrologic factors, there are too many potential accidents and leakages of radioactive materials, both from transporting and storage. With the nation's fastest growing cosmopolitan area and world mega resort so close, it's a time bomb for a national disaster that would make Chernobyl a pale memory. It's time to harness the site's natural energies, and generate electricity from solar and wind sources so abundant at the site.

Sincerely,
Danielle Alegre
