This is in regards to The supplement to Draft to Environmental for Yucca Mountain.

To whom this concerns,

1 Please do not ship radioactive wastes through my neighborhood or state. I am told 47 states are to participate in this mistake.

2 Please, stop using nuclear power. It is unsafe. It is deceptivly expensive. I, as a taxpayer, do not wish its use any further. We, as humans, have never had a safe place to store these deadly and longlived materials. Please consider the poision being created, and find a safe way to continue.
