Characterization Office
(M/S #025)
North Las Vegas, NV 89036-0307

M. Hanlon,

How can the Secretary of Energy be preparing to recommend Yucca Mt. for a high-level nuclear waste dump when thousands of public comments on the DEIS have not been addressed?

70,000 metric tons of high-level radioactive waste from commercial nuclear reactors

would be shipped to the proposed dump, launching an unprecedented nuclear transportation scheme. The Yucca Mt. shipments likely would pass within half a mile of the homes, schools, and workplaces of 50 million Americans in 43 states.

Without a final EIS, a detailed transportation scenario or licensing rule, DOE lacks the basis for consideration of site suitability.

I urge you to abandon the Yucca Mt project when the public cannot have confidence in any recommendation that arises from such a flawed process.

Sincerely,

Joanne L. Campbell
