To: Carol Hanlon, DOE
Yucca Mountain Site

From: Sarah Brown
22 Main St.
Kittery ME 03904

Dear Mrs. Hanlon,

I am very concerned that the Secretary of Energy may recommend Yucca Mountain for a nuclear waste dump, even when public comments have not been addressed. Clearly the Department of Energy lacks the ability to choose or consider a site without an Environmental Impact Statement, a transportation scenario or even a licensing rule. How could the American people possibly have confidence in such an incomplete recommendation process. I ask you to cancel such a flawed project. I also request an explanation from you or your department how such an incomplete recommendation process could even be taking place.

Thank you.

Sincerely,
Sarah M. Brown
