Subject: EIS Study

-
- 1 | My family strongly objects to the strong arm tactics of your attempted power
2 | play to push the EIS Study on Yucca Mt. through without adequate time for
study and response. | We don't want the nations nuclear waste buried near us
and we certainly don't accept these tactics to bury this poison while
circumventing complete scientific and knowledgeable study of the hazards to
our health and well-being. Your arrogance and disregard for the well-being
of the citizens of Nevada is criminal. |

Sondra & Arthur Mandell
