Dear Ms. Hanlon:

The enclosed article reproduced from the Public Citizen News Sept/Oct. edition emphasizes and crystallizes my concerns about the possibility of Yucca Mt. being used as a nuclear waste dump. The Sec. of Energy's recommendation comes without addressing and listening carefully to the thousands of public comments, without a Final Environmental Impact Statement, a detailed transportation plan or a licensing rule, the Dept. of Energy lacks the basis for consideration of site suitability. The general public would not approve of any recommendation that arises from such a dangerously incomplete process. Please abandon the Yucca Mountain project

Sincerely,
Sandra Helton
