RE: NUCLEAR STORAGE AT NEVADA TEST SITE

- 1 We hereby strongly protest the Nuclear Power Industry's using the Nevada Test Site for high-level commercial nuclear waste storage. Nevada has never been involved in the commercial nuclear power industry, and our citizens oppose becoming the dumping ground of this waste.
- 2 We agree with Senator Richard Bryan (D-NV) that "the single greatest threat to Nevada's long-term health and safety would be a high-level nuclear waste dump just 90 miles outside our most heavily populated city."

Consideration should also be given to the danger to other areas throughout the United States in the shipping of such nuclear waste in the event of a catastrophic accident involving whatever method of transportation was being used.
