official comments on Yucca Mountain Site Suitability October 5, 2001

To whom it may concern:

Since the U.S. has never provided proof of ownership of the Yucca Mountain land it is a gross violation of the western Shoshone Nation's rights to even consider using their land as a nuclear waste dump. Shame on such plans — the time has come in our U.S. nation for REPENTENCE. We all need to listen to the many grievances if there is to be healing all over our planet.

Sincerely,

Mary Ann Goertzen grandmother artist homemaker teacher
