Dear Jerry Hanlon,
I am appalled that you are preparing to recommend Yucca Mountain for a high-level nuclear waste dump when public comment has raised 1000's of concerns that must first be addressed. This is not a democratic process. A Final Environmental Impact Statement, a revised transportation scenario & licensing rule & conformity with the Safe Drinking Water Act are all necessary first, especially in light of current terror events.
Margaret McBride, 6 Plum St Gloucester MA 01930
