Dear Mr. Hanlon,

I wish to protest the utilization of Yucca Mtn for the storage of out-of-state nuclear and/or other hazardous material etc.

Each state should store their own nuclear waste.

Nevada should not assume all the risks of storage (with possible potentials of accidents or leaching) nor should we have to assume the inherent danger of inter-state transportation.

We have already seen, on Sept. 11, how the unimaginable & highly improbable can happen.

Please protect the citizens of this state & the future of our wholesome environment.

Caution & care are the watchwords.

Sincerely,
Joan M. Zoll
