Send a letter immediately as the 18th of October is the last day for proposal against transporting nuclear waste in our state!

RECEIVED
OCT 29 2001

With all the possibilities of terrorist attack within the United States, there should not be dangerous materials transported across state lines. The threat of terrorists using our nuclear waste against us is simply too great and places innocent people at risk. With the terrorists creating so much carnage so easily in New York, how dare you put any other state in harms way! Even if America finds and destroys the terrorists leadership, we will still need to be vigilant in our protection of Americans on our own soil!
