Comments: (If possible, please reference section and/or page number in document if applicable.)

Yucca Mt. on the AEC Test site is unique in the U.S. as it is the ONLY location where the storage of Nuclear waste would not measurably affect a community or human population. I worked on the Test site for 4 years in the '60's and passed the Yucca Mt area as well as Sedan Etc, daily. It will be hundreds, perhaps thousands, of years before humans could consider living within the bounds of the test site. What better place to store expended Fuel rods? With this disposal facility available states could proceed with construction of new atomic power plants secure in the knowledge that their major problem is disposal of radioactive waste, was solved.

I do believe that the state of Nevada should share in the revenues generated by such a site.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible, then secure with tape.
