EIS000366

NOV 04 1999

14 MR. TALBOT: Lyle Talbot. I represent the Desert
15 Citizens Against Pollution, and our home base is in the
16 Antelope Valley to the south of you.

1... 17 I want to talk about emergency response to
18 mobile Chernobyl, if you would. When and where there is a
19 transportation accident -- it's a foregone conclusion by
20 the general public -- some questions arise. (1) What
21 agency will provide the first response -- federal, state,
22 or local agency? (2) What training will have been provided
23 to the responders and by whom? (3) Who will bear the
24 overall financial responsibility for such training and
25 equipment necessary for local containment? And, lastly,

1

1 cont. | 1 Who will bear the costs beyond the emergency response, such
2 as regional effects like the river contamination that
3 happened at Dunsmuir on the Sacramento River and
4 contaminated Shasta Lake a few years back?

5 Those are my comments. Thank you.

6 MR. SKIPPER: Thank you.

7 THE FACILITATOR: That concludes the folks who are
8 formally signed up. Is there anyone else who would like to
9 comment at this time?

10 We are -- yes.
