

DEC 02 1999

1 . MS. KUHN: My name is Rachel Kuhn, and [] I just want to say that I don't think that it's a good idea that we put it in Nevada because lots of people do live around here, and it's not just Nevada wasteland.

I have heard that some people got cancer when they have been around nuclear waste, and I don't know if that's true. But if people do live around Yucca Mountain, which I'm sure some people do, they might have a chance of getting cancer and die.

And I just don't think that it's a good idea because there are many other places that we could find to put it where nobody lives around and there aren't any fault lines or there could be nothing around to damage the nuclear waste. []
