Subject yucca mt.nuceular waste site

:

1 Yucca Mountain should not be used for a dump site for nuclear waste
because it has to travel thru so many states where an accident could
happen. It also presents problems for the people of Nevada
2 having this radiation so close to them via the beltway on I-95 and I
-15. The entire United States
should share this burden, not just one state. Surely, there is other
possibilities for solving this
problem than dumping everything in Nevada. We have children, pets and
lives that could be
negatively affected by this. With the great intellect that our country
has in the minds of scientists and
government leaders, you can find a better solution like dividing it up
among the states. It is bad
enough that we had to have nuclear waste, why make it worse.. Think.
This isn't agent orange
that the government denied existed or the problems with Veterans in the
Persian Gulf War.
This is another reality. Get with it and fix it in a positive way.

Nancy
