1 Comments: Why not just swallow some pride..realize the project is niether safe nor wanted..and start over trying to find a safer spot or wait until the scientist who are trying to develop a system that actually eats away at radioactive material, comes alive. Or is it just because Pro-Yucca mtn.folks realize that by the time it becomes a problem..they will all be dead anyway...but then so will all their future generations. Papermail: 9753 Panorama Cliff Dr. Las Vegas, Nv. 89134
