EIS000971

Comment on the Department of Energy's Yucca Mountain Draft Environmental Impact Statement

RECEIVED

JAN 25 2000

I agree with the following statements which I have checked:

- 1 The No Action Alternatives are not reasonable. The EIS should have a reasonable no action alternative.
- 2 The EIS is inadequate because it uses outdated 1990 census data rather than current population data for Nevada.
- 3 The analysis of transportation impacts in Nevada is insufficient for making modal, corridor and route decisions.
- 4 The floodplain analysis is insufficient for corridor and route selection
- 5 The impact of stigma on tourism, recreation and agriculture based economies in Nevada should be analyzed.
- 6 The EIS should analyze the impacts of a crash between a military airplane and a nuclear waste rail car.
- 7... Other Yes, the NEVADA residents, do not want a forced nuclear waste deposit!

Comments:

The Department of Energy's Yucca Mountain Draft Environmental Impact Statement includes an option to construct a rail line from Beowawe to Yucca Mountain through Crescent Valley to transport nuclear waste to Yucca Mountain. DOE is required to consider all comments submitted regarding the impacts of building and operating a repository including transportation. My comments for the record are:

7 cont.

Time & time again, the people of Nevada have made it clear, we do not want this nuclear waste deposit. There are some who want it, but the people do not!

That says that has in its veins

"What part of no don't you understand?"

Applies very well in our situation.

If this isn't clear enough for you to understand -

Please take your nuclear waste disposal to

Washington D.C. where it may do some good!
