January 20, 2000

1 The Missouri Coalition for The Environment

Opposes shipping highlevel radioactive waste
through St. Louis and Missouri. The safety of this
proposal has not been demonstrated - accidents and
deliberate sabotage pose real risks to the safety
of shipping highlevel radioactive, whether by rail or truck.

2 Further, Yucca Mountain has not been shown
to be an acceptable repository for these wastes.

The longterm geological stability of Yucca Mountain
is not assured. Shipping spent fuel rods around the
country before a long-term disposal method is
demonstrated is risky and not in the public interest.
