Comment Text :

-->Dear Ms. Dixon,

1 [One more voice from Nevada to say, Nevada is not a waste land. But no place is a waste land. All places are precious and we should not bury our poisons anywhere. We should stop producing poisons and we should leave this waste where it is. In twenty or thirty years we will have evolved a more enlightened approach to rid ourselves of this mess. Until then it isn't doing any harm where it is. Please find the courage to disappoint Trent Lott and the nuclear power industry. Please find the courage to put the safety of citizens first. Leave the waste where it. Leave the desert of Nevada safe for living things.

Sincerely,

Margaret C. Pierce
