Dear Ms Dixon:

It is my understanding that there is a proposal to transport nuclear waste by rail through the metro St Louis area to a storage site at Yucca Mountain in southern Nevada.

- 1 As a resident of a St Louis suburb, I'm very concerned about thousands of shipments of radioactive waste traveling through our metropolitan area. There is too much potential danger in transporting this waste and I feel it would jeopardize the safety of our community and its people.
- 2 Let's find a way of disposing of or storing this waste without transporting such distances. I don't think any residential area wants this kind of material anywhere near where they live.

Sincerely,

Louise O. Hauf
