Comments: (If possible, please reference section number and/or page number in document if applicable.)

I envision a world in which the investment and human effort currently allocated to nuclear power (and N-weapons) programs are instead allocated to energy conservation programs and renewable energy programs. In such a world, the repository you are contemplating would be unnecessary. That is the world we should be building.

I write these lines knowing that you, the reader, may find these thoughts naive. ~~But~~ But it is more naive to remain wedded to an unsustainable nuclear power structure.

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible; then secure with tape.
