I request that these comments be made a part of the official record.

Incomplete health impact assessment.

- It is assumed that the only radiation health impact is one of cancer fatality, "latent cancer fatality". Cancer fatality represents only one of many radiation health impacts; other possible effects are premature aging, mild mutations in offspring, excess tumors, and genetic and teratogenic effects.

It's my belief that there is nothing to come
of radioactive waste, we must put a stop
to this genocide
