DEBRA SUTTON

JAN 20 2000

MS. SUTTON: I'm Debra Sutton and I'm a resident of Webster Groves and I'm also a teacher. [The
decision to move the spent nuclear fuel from the northeast to the far west seems to be based on sound
logic. Put this material into a less populated area so it will affect less people. However, I pose that it
already is in an area that is fairly unpopulated. Nuclear reactors tend to be away from densely populated
areas such as our nuclear reactor in Callaway County. In that respect, why not leave it where it is?] Thank
you.
