Dear Ms. Dixon, EIS Manager:

My name is Hailey Kintzer.

I am an 8th grader at Rosemary Clark middle school (RCMS) we have been learning about nuclear waste in science class and I have some concerns.

1 we have been talking about other states putting their Nuclear Waste in Yucca Mountain. Why don't the states that make Nuclear Waste keep it? What if it leaks into our water? I doubt those states care what happens to us. People could get sick really sick. Do they just think were a dumb state? Do they think we will just take money and let them

2 dump Nuclear waste into our Mountain? Where is the money going? Money won't help us if we get sick, we'll have to pay our medical bills out of + Cont...

#2 cont...

OUR own pocket. Think of all the people who can get sick. What will happen to us if a truck gets into a wreck and an explosion occurs? Think of the people in it will hurt or even kill. By putting nuclear waste into Yucca mountain you're not only hurting people but wildlife and plants. Think of all that will be damaged by it. Please reconsider putting the nuclear waste in Yucca mountain.

Sincerely

Hailey Kintzer
