EIS002178

Dear Mr. Richardson,

1

[I would like to express my concern over the proposed nuclear waste movement to Yucca Mountain.

Yucca Mountain is in the middle of sacred Shoshone Indian land. This is a violation of their rights, as well as a continuance of hundreds of years of Native American discrimination our government professes to despise. Please respect their land, traditions, and sovereignty.

As the proposed movement of waste occurs, it will travel within half a mile of 50 million Americans' homes. As these people are uninformed of this potential threat, and have not given their consent, it would grossly infringe upon their rights as US citizens.

Thirdly, Yucca Mt. is an unstable environment to house nuclear waste. Potential earthquakes and poor storage plans could plant the seeds for future disasters.

Please carefully consider the outcomes of the Yucca Mountain proposal, and then honor the Shoshone, the US citizens, and the earth itself by not moving the nuclear waste to Yucca Mountain
Thank you.

Sincerely,

Karen Mesko
