Subject: nuclear testing

1  
It seems pointless to express my very strong anti-nuclear views to you, because it seems to me that you people must be insane to be developing and testing nuclear weapons, and what is the point of trying to reason with insane people? Still, I feel I must. I am a tax-paying, voting American citizen and I am telling you now-stop building and testing your big toys right this very minute! You have no right to be doing what you are doing, with it's huge, NEGATIVE consequences.

Very sincerely, Kirsten Mitchell
