<input type="checkbox"/> If you want to be on our mailing list to receive information about the Shoshone Indian Treaty Environmental Impact Statement or site characterization, check here. Section 3.1.1. This needs more honesty than it has in all areas.					

Comments: (If possible, please reference section and/or page number in document if applicable.)

1 Supplement Hearings: So few for a National program and most held in evening when some seniors can't see to drive and have brains enough not to attempt it, disabled people are too exhausted to go out in evenings, working (days) people can't attend daytime meetings and working (evening/graveyard) can't attend evening meetings. There should be day & evening meetings held in NV and also held where rural people don't have to drive 45 or more miles to get to one. Supplement Book should be in John Q Public's layman, easy to understand language with books available in a more places. There should be an extension while all materials are being

2 broken down language-wise. Page 2-20 shows proposed use of an area that hasn't been investigated yet - Table 2-1. These identified features and parameters are said to "bound" the design so potential impacts could be analyzed, yet it isn't specific on identity of alternatives. In 1999 DEIS made same claim, what will happen as Final EIS designs "evolve"? Final Design

3 Choice: This supplement does nothing to achieve that Accident Scenarios should include pool which is built to the buildings specifications also which means it can collapse as well as the building. What about contaminated ground water? Water: Where is DOE going to take their water from or I should from whom? Radon: Page 3-4, measured from incorrect areas, measure where people are going to be, where it can do damage. Not enough space so I'll condense: Flooding, Earth Quakes that have done damage, what about larger ones?

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the U.S. Department of Energy by June 25, 2001. To the extent practicable, the Department will consider comments received after June 25.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible, then secure with tape.

474k County - Pahrump's high rate growth not taken in consideration. See by address
