 To Whom It May Concern:

1 I am writing to express my concern that the Yucca Mountain in Nevada may be used as a nuclear waste storage site. I recognize the fact that we have a major problem on our hands to dispose of nuclear waste safely (as well as a compunction not to create any more nuclear waste). However, I do not think that Yucca Mountain is the place for this waste. There are too many unpredictable factors that could make the area unsafe for storing such dangerous materials. If the waste infiltrates the water supply for residents near the mountain, or if an earthquake shifts the mountain and allows waste to leak out and poison the surrounding land and air, then we have a potentially catastrophic situation. More research needs to be done on this issue, and more thought put into where we store our nuclear waste. This mountain is not the best possible solution, and with such dangerous waste, we need the best possible solution.

Sincerely,

Erin Carmany

Dunkirk, MD
