---> Comment Text :
1 | Has this plan been well thought out as to its long-term repercussions?

President Bush appears poised to approve Nevada's Yucca Mountain as a storage site for high-level nuclear waste, even though the region is earthquake-prone. In addition, water flows beneath the mountain, so it could infiltrate the waste containers, corrode them and carry radioactive

waste into the groundwater.

More than 60 million Americans live in 43 cities along nuclear waste transportation routes.

I feel it is foolish to continue with the plan to use the Yucca Mountain as a high-level nuclear waste storage site.

I urge you assist in scrapping the Yucca Mountain proposal.

Sincerely,

Thierry Hansard

Austin Tx 78723
