--> Comment Text :

At issue is the geographical location for the proposed site. Most nuclear facilities are located in the east coast or mid-west states. This creates an unsatisfactory need for transportation of wastes through American communities and effectively makes the West a nuclear dumping ground. This imposes a monumental risk with few or no benefits. As a stake holder in the decision to store nuclear waste at the Yucca Mountain location, I find the site unsuitable as a safe geologic site and fair and unbiased decision. I strongly object to this project and further view any expansion of nuclear facilities without appropriate disposal of wastes not in the interests of the American people.
