Comments: Yucca Mountain has shown me that nuclear waste can be stored safely. Safely transporting waste to Nevada highly doubtful. It has been shown that dry storage can last for 100 years so leave it stored where it is. Stop spending money on Yucca Mountain and start spending that supposedly 60 billion dollars on a safe and natural replacement for our energy problems. I believe \$60 billion could have found a way to harness the sun's energy, or to use the natural winds we enjoy, or even to use geothermal energy. This is the direction we should be directing ourselves.
