

NEV. APPEAL, 2/7/2K1

## Nevadans should get compensation

RECEIVED

SEP 16 2001

You leaders must begin to stand up like men for a change and demand true compensation.

If we, as Nevadans, are forced to make a small portion of our state a nuclear waste site, we must demand these things:

1. The government must build a large electric generating plant, powered by nuclear means (the area will be perfect for such because of the waste products being stored there) at this waste site.
2. Nevadans receive free electric power.
3. No other areas to ever be picked for such waste in this state must be forever agreed on.
4. A thorough search must be made of underground water, and if a running river exists, all proposals for making this site a nuclear waste dump must be abandoned by EPA edict.
5. Only designated highways (so chosen by Nevadans) entering our state can be used for transporting "others" nuclear waste to its destination.
6. All vehicles (trains included) must be accompanied by our own police/inspectors at our borders in order to doubly ensure safety. This department to be funded by the federal government alone.
7. Only Nevadans (four years a citizen of this state minimum) employed in this venture.
8. Nevada lawmakers must then reduce our sales tax to 3 1/2 percent and never, ever (by statute) increase it.

The above demands must be met or the whole dump site must be abandoned. Otherwise, let every other state handle and store their own nuclear garbage.
