SEP 19 2001

**Part of Records Package / Supplement / Correction**

Hello-

Please do your utmost to help postpone the hearings and extend the deadline for public comments on the proposed Yucca Mountain Nuclear Waste Site. At minimum, we need to have the complete Environmental Impact report available for study and discussion before we can comment adequately and intelligently on this matter. Also, it would seem that having the site suitability rules finalized would be a prerequisite for any meaningful discussion of the matter. If the public cannot have complete or adequate information regarding projects like this, then these projects should be postponed until such time as meaningful dialogue can take place.

Thank you for your time!

Chip Smith
