**Comments:** (If possible, please reference section and/or page number in document if applicable.)

No waste at Yucca Mountain -

Why?

① Transportation - How can you possibly believe every truck will be safe - This is 9/11/01 - Security is really on my mind -

② Time - How can we even begin to believe that we can contain spent fuel rods for at least 10,000 years. 10,000 years ago human beings were learning to farm and domesticate animals. You must be deluded to believe we can plan that far into the future.

③ Response to accident or attack - How can we stop something that could be airborne if it were exploded (does today not remind us that this can happen?).

Please note: For your comment(s) to be considered by the Secretary of Energy before a decision is made whether to recommend the site to the President, your comment(s) need to be received by the U.S. Department of Energy by September 20, 2001. To the extent practicable, the Department will consider comments received after September 20, 2001.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible, then secure with tape.
