Subject: Please oppose Yucca Mountain as nuclear waste dump

Part of Records Package / Supplement / Correction

Dear Senators Cantwell and Murray, Representative Larsen, Ms Hanlon:

It is unfortunate the Secretary of Energy intends to recommend Yucca Mountain for a high-level nuclear waste dump although thousands of public comments on the draft EIS have not been addressed.

Without a final EIS, a licensing rule, and a detailed transportation scenario, the DOE lacks the basis for consideration of site suitability. Citizens have no confidence in any recommendation that arises from such a terribly flawed process.

Abandon the Yucca Mountain project.

Thank you.
