Subject: Yucca Mountain Project

Part of Records Package / Supplement / Correction

Individual comments on the Yucca Mountain Project (YMP):

1. At the beginning of the peaceful use of nuclear power the government and utilities agreed that the U.S. government would take title of spent nuclear fuel. The government needs to do their part.
2. Due to recent terrorist events, spent fuel cask and jetliners would not mix well creating a risk to the public. Utilizing the YMP to store spent fuel would the elimination of the terrorist threat and protect the public.
3. The facility will create new jobs and will possibly create even more jobs due to new nuclear plant construction based on the final disposition of the spent fuel. This will help our country from a perspective of the economy, energy production in a time shortages, and more stable and secure storage of radioactive material.
