Please forward my comments on to Nevada Yucca Mt. Nuclear Dump hearings:

Again, I voice my opposition to the nuclear dump at Yucca Mt.

I am opposed to any national dump site.

I am opposed to any transportation of nuclear waste.

If nuclear waste is allowed to be generated, it should be stored at the site where it is generated, and not expose more people to a catastrophic spillage en route to storage.

If nuclear waste were dumped where generated, hopefully generator of the waste will think of safer, alternative plans to its creation in the first place.

Additionally, the geology of Yucca Mt. will not withstand the hundreds and thousands of years of calm geologic inactivity to render the site absolutely guaranteed safe.

How many times must we say, "No" to nuclear dumping in Nevada?
